

IN-HOUSE TRAININGS

Experience you can trust

IN-HOUSE TRAININGS

Custom designed programme

Our experts know from experience. Having coordinated dozens of projects under various EC programmes and across a diverse range of topics, we are capable of offering custom designed in-house trainings – ask and we'll let you know what is possible.

Guaranteed, this won't be simply another "info day"!

Project Development

Brilliant ideas are meaningless until transformed into something tangible. Our course on "EC Project Development" prepares your staff for constructing the best possible project, from inspiration to initiation. Our experts explain how to prepare a competitive proposal, how to successfully manage accepted proposals, and the tricks to effectively disseminating your future project.

Project Coordination

As an FP7 project manager you face many challenges day by day. Negotiating the Grant Agreement with the EC can be very demanding and getting the Consortium Agreement finalized extremely stressful. Partners do not always meet the expectations, often submitting documents late or incomplete. Deadlines are strict and surprises before an EC review are not welcome. With our help you will avoid major mistakes, ensure proper financial reporting, communicate clearly and achieve successful management.

Financial Project Management & Audits

Up to five years after a project's closure, the EC may still conduct an audit and failing this can be a disaster for a project. Many factors can spell doom for the success of a project, but the two most significant are generally inaccurate financial reporting and ineffective communication. With the guidance and tips presented by our experts, your organization can learn how to properly allocated costs to EC projects and go through an audit with confidence. Possessing the knowledge that you've followed the rules and are well-prepared to face an audit will make participation in EC projects much more enjoyable – and greatly benefit your organization.

The vast opportunities from EC-funded projects are out there, but obtaining funding often takes skills and techniques which few organizations truly know how to utilize. Let our experts simplify the process and present your staff with the knowledge required for success.

Experience you can trust

Our Pool of Expert Presenters

with their speciality and just some of the projects they've coordinated!

Ms. Bodil Palmberg

is an economist working as project manager at Europa Media. In addition to her work responsibilities related to proposal development and project management, EU policy analysis and monitoring the EU financial opportunities, she is also a lecturer and workshop moderator at our trainings.
